

8 Reasons Customers Prefer Fully Managed GovDataHosting Cloud over Self Service Cloud Providers Like AWS and Azure

GovDataHosting empowers federal agencies and their supporting government contractors with single-source, integrated cloud infrastructure and services. We combine government-focused cloud hosting solutions, advanced cyber security services, and leading information management technologies to accelerate your transition to the cloud.

1 Simplicity of Implementation

No cloud-specific expertise or certification is required – everything is handled by U.S. based GovDataHosting support team.

2 Unmatched All-Inclusive Value

Maximize your budget with the industry's best price to performance bundles resulting in deeper cost savings compared to the total cost of support in a self-service cloud.

3 U.S Government Focus

The only FedRAMP High Impact authorized cloud provider focusing exclusively on mission critical and secure application cloud hosting needs of government agencies.

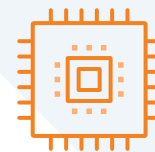

4 Privacy Data Oriented

Government CUI, PII and ePHI data is welcome at GovDataHosting cloud due to extra security controls not offered by self-service clouds.

5 Hardware Appliances are Welcome

Unlike self-service clouds where only virtual appliances are allowed, Government-owned hardware appliances are always welcome at GovDataHosting.

6 Easy Centralized Billing

No need for multiple invoices, all customer utilization of cloud resources and support services is provided in a single, easy to understand monthly invoice.

7 Flexibility of Software Licensing

No need to procure separate operating system or security software licenses, we got it all covered, just bring your own software to run on our secure cloud platform.

8 Direct Source for All Cloud Needs

No need to involve multiple vendors, GovDataHosting directly provides all technical, security and project support to deploy and operate your government systems in our cloud.
