GOVDATAHOSTING

GovDataHosting's (GDH) mission is to continue as the market leader in FISMA compliant secure government IT system hosting, as we seamlessly provide cutting edge secure hosting solutions and pioneer more productive cost-effective technologies that enhance our customers' security posture and fulfill our clients' secure hosting mission goals.

For over 20 years we have been provisioning, managing and securing IT systems for our clients.

What Sets GDH Apart from the Competition?

▶ **FedRAMP High Certified Cloud IaaS**
▶ **PMI Certified Implementation Management Team**
▶ **24x7x365 Network Operations Center**
▶ **Authority to Operate Guarantee**
▶ **NIST & DoD Compliant Turnkey Solutions**

Core Capabilities

Our technology experts and business professionals analyze research, design and implement solutions in the areas of:

▶ **FISMA Cloud Hosting**
▶ **Cloud Solution Implementation**
▶ **Bundled IT Management & Security Services**

FISMA Cloud Hosting

GovDataHosting remains the leader in providing fully managed FISMA compliant hosting solutions to U.S. Government agencies. All project coordination tasking, technical, security, disaster recovery, audit support and documentation aspects of your initial system deployment as well as on-going operations are provided by our certified personnel to ensure expedited Assessment and Authorization (A&A) processes and issuance of an Authorization To Operate (ATO).

Cloud Solution Implementation

Each customer engagement is managed by a Project Management Institute (PMI) certified project manager experienced in deploying FISMA compliant hosted solutions. A technical account lead also supports each solution to enforce quality and ensure delivery of customer's secure infrastructure. GDH provides support services from Columbia, MD, Cleveland, OH and Dallas, TX. All support personnel are required to be U.S. Citizens with required successful adjudication of background investigation from U.S. Office of Personnel Management. Most of our personnel hold various levels of security clearances.

Bundled IT Management & Security Services

Our fully managed services stack includes management responsibilities of all telecom, network, hardware, operating system, database, web server software, commercial off the shelf (COTS) and custom solutions. Our customers' IT systems are monitored for technical performance and security throughout the entire technical stack through our separate 24x7x365 Network Operations Center and Security Operations Center. This enables us to provide our clients with a 100% infrastructure availability SLA. This performance guarantee also extends to all system components under our managed care support to ensure that customers receive the optimal level of performance expected for government mission-critical systems
