

GovDataHosting Cloud Platform

FedRAMP High (Class D) Certified Government Cloud Platform Data Sheet

FedRAMP High (Class D) Certified · DoD IL2 Authorized · NIST 800-53 Rev 5 High · SOC 2 Type II · 24/7 U.S.-Based SOC

One Vendor. One Contract. One Invoice.

A FedRAMP High (Class D) Certified Platform-as-a-Service bundling cloud infrastructure, security and compliance, technical support, and disaster recovery into a single procurement. Agencies and contractors inherit 300+ NIST 800-53 Rev 5 controls from our authorization boundary — removing the cost, staffing, and schedule burden of assembling a compliant environment from separate vendors.

Deploy on **GovDataHosting Cloud IaaS** (our own FedRAMP High (Class D) Certified infrastructure), on **AWS GovCloud** (managed by GDH; IL4/IL5 available), or on **Azure Government** — under one compliance boundary and one continuous monitoring program.

THE BUNDLE

Cloud Infrastructure

Technical Support

Security & Compliance

Disaster Recovery

WHY THE BUNDLE WINS

- ▶ 300+ inherited NIST 800-53 Rev 5 controls
- ▶ ~40% faster ATO timelines
- ▶ 10–40% cost savings vs. assembling it yourself
- ▶ 1–3 day basic cloud setup

U.S. DATA CENTER FOOTPRINT

Columbia, MD

PRIMARY OPERATING SITE

Company HQ. Primary production cloud region for federal and contractor workloads.

Cleveland, OH

CLOUD INFRASTRUCTURE SITE

Additional U.S. cloud infrastructure capacity and regional diversity.

Dallas, TX

ALTERNATE / DR SITE

Encrypted replication target for failover, off-site backup, and contingency planning.

▶ **Geographic & carrier diversity:** Columbia and Dallas are 1,000+ miles apart, linked by encrypted low-latency VPN for grid- and carrier-diverse replication. All data stays in the contiguous U.S., supported only by U.S. citizen personnel.

TELECOM & CONNECTIVITY

▶ Global IP backbone (AS701) with 100 Gigabit Ethernet, Private IP reach across 150+ countries, and 80+ U.S. IP nodes. Adds cloud DDoS scrubbing (DDoS Shield) for L3/L4 volumetric defense.

▶ Nationwide U.S. fiber with high-capacity wavelength, Ethernet, and dark fiber transport, plus managed networking for enterprise and government customers.

▶ Facilities-based Tier 1 all-optical IP network (AS174), IPv6 and MPLS enabled, serving 300+ markets on a non-oversubscribed backbone with dense peering.

▶ Multi-carrier resilience: Connected to Verizon, Windstream, and Cogent/Cross Connect 20+ carriers enabled — diverse upstream transit, not a single-carrier dependency. Bandwidth is NOC-monitored and scalable on demand; the platform is fully IPv4 and IPv6 compliant.

MANAGED SERVICES CATALOG

MANAGED NETWORK & INFRASTRUCTURE

▶ Managed Network (VPC, IP addressing) ▶ Firewall (deny-all / allow-by-exception) ▶ VPN (FIPS-approved, 2-factor) ▶ Reverse Proxy / Load Balancing / WAF ▶ DNSSEC ▶ Backup ▶ SSL Certificate Management

MANAGED SECURITY COMPLIANCE & CYBER DEFENSE

▶ Anti-Virus / Anti-Malware & HBIDS ▶ Compliance Documentation (A&A, SSP, ATO) ▶ Disaster Recovery ▶ Intrusion Detection ▶ Log Aggregation (30-month) ▶ Vulnerability Scanning & POA&M ▶ Incident Response (SOC CSIRC) ▶ Continuous Monitoring ▶ Configuration Management ▶ ISSO

MANAGED APPLICATION SUPPORT

▶ Operating System Administration ▶ Database Administration (STIG / CIS) ▶ Patch Management (250+ apps) ▶ Server / Application Monitoring ▶ Drupal Core ▶ MS Exchange ▶ MS SharePoint ▶ Application Migration

VALUE-ADDED SERVICES

▶ ServiceDesk Portal ▶ Software License Provisioning ▶ Project Management Coordination ▶ System Design ▶ Cloud Readiness Assessment ▶ FedRAMP Readiness Review ▶ Digital Forensics ▶ Security Assessment ▶ Asset Management
